Stop throwing away your inventory. Save \$15,000+ a year with Therma

24/7 wireless temperature and humidity sensors built with you in mind.

Consistent Around-the-Clock Monitoring

Colnspect's equipment monitoring hardware collects data 24/7, eliminating missing data, inaccurate numbers, and inventory waste. Less time spent logging temperatures gives employees more time for other tasks.

Effortless Integration

Built to perform inside coolers, freezers, and other harsh environments, our sensors are easy to place and don't require wiring or drilling. Our all-in-one system requires no change management.

Effortless Inventory Protection

Avoid costly inventory spoilage while monitoring temperature, humidity, and energy consumption with two easy steps. Set up takes less than 10 minutes - zip tie the sensors in place and plug in the hub. Data is encrypted and transmitted to your dashboard in minutes via 4G - no internet connection or configuration required.

Actionable Real-Time Notifications

The days of surprise breakdowns and lost product are over. Prevent incidents with configurable alerts via email, SMS, and/or phone. Notify multiple team members to ensure immediate resolution.

Unparalleled Data Visibility

Use any web-enabled device to view real-time data on a streamlined dashboard built with operators in mind. Detailed analytics and historical temperature data unlock predictive equipment maintenance.

Military-Grade Data Security

Your data is your most valuable asset. We protect your data like we protect our own -- end-to-end encrypted with multiple layers and NSA-approved protocols.

“Therma's continuous equipment monitoring already prevented one food spoilage event within the first 3 weeks.”

Derek Sears

Operations Specialist Director at Barberitos

“Since deploying Therma, we have saved more than \$3,000 in the past 3 months alone that would have resulted from food spoilage, guest experience impacts, and emergency maintenance costs.”

Jenni Sherman

Kitchen Manager at TGIF Plano, TX

“We were concerned about a power outage due to a storm. Therma helped us maintain food safety and saved us a ton of money.”

Chris Veronesi

Director of Kitchen Operations East Coast at Garden Fresh Central Kitchen
